# THE RIGHT HEAVY DUTY COOLANT FOR ANY NEED

PRODUCT NAME	FLEET CHARGE SCA PRECHARGED	FLEET CHARGE HYBRID BLUE	FINAL CHARGE NOAT	ELC NF	FINAL CHARGE GLOBAL
PRODUCT DESCRIPTION	<p>FLEET CHARGE SCA PRECHARGED Coolant/Antifreeze is a fully formulated, ethylene glycol-based coolant, precharged with advanced technology Supplemental Coolant Additives (SCAs).</p> <p>Because it is precharged, FLEET CHARGE SCA PRECHARGED Coolant/Antifreeze requires no SCAs at initial fill and ensures proper chemistry at every top-off. FLEET CHARGE SCA PRECHARGED Coolant/Antifreeze uses a low silicate and phosphate-free formulation.</p>	<p>FLEET CHARGE HYBRID BLUE Coolant/Antifreeze is a Hybrid Organic Acid Technology (HOAT) Extended Service Interval (ESI) coolant with a phosphate-borate dual buffer system, nitrite and a low silicate level.</p> <p>It is formulated for use in heavy duty engines, regardless of fuel type, as well as in automobile and light duty applications. Its characteristic blue color identifies it as a hybrid coolant.</p> <p>FLEET CHARGE HYBRID BLUE Coolant/Antifreeze is designed to work with liquid and slow-release Supplemental Coolant Additives (SCAs) available in the market today, simplifying coolant maintenance while extending service intervals.</p>	<p>FINAL CHARGE NOAT Extended Life Coolant/Antifreeze is an advanced Nitrited Organic Acid Technology (NOAT), globally formulated, ethylene glycol-based coolant which uses organic acid corrosion inhibitors to provide guaranteed protection to all cooling system metals.</p> <p>With proper maintenance<sup>†</sup>, FINAL CHARGE NOAT Extended Life Coolant/Antifreeze delivers guaranteed cooling system protection without the use of Supplemental Coolant Additives (SCAs).</p>	<p>PEAK Heavy Duty ELC NF Nitrite-Free Extended Life Coolant/Antifreeze has been developed to meet the changing requirements of Domestic, European and Asian OEM's.</p> <p>This formulation is based on proven carboxylate organic acid technology (OAT), and is designed for use in all diesel, gasoline and natural gas engines in light, medium, and heavy duty on-highway applications. The inhibitor system provides complete CAB brazed aluminum corrosion and erosion protection while maintaining optimum heat transfer conditions for total HD engine system performance.</p>	<p>FINAL CHARGE Global Extended Life Coolant/Antifreeze is an Organic Acid Technology (OAT), globally formulated, ethylene glycol-based coolant, which uses non 2-EH organic acid inhibitors to provide guaranteed protection to all cooling system metals.</p> <p>With proper maintenance<sup>†</sup>, Final Charge Global Extended Life Coolant/Antifreeze delivers guaranteed cooling system protection for ONE MILLION MILES of on-road use (8 years or 20,000 hours of off-road use) without the use of Supplemental Coolant Additives (SCAs).</p>
